

Safety Shield

Windshield repair and replace protection for new and pre-owned vehicles

The treated windshield product assists in the prevention of cracks, chips and stars, sand pitting, snow and ice build-up, is water resistant and reduces glare at night. If damage caused by a road hazard occurs, permanent windshield resin repair costs are covered with the Prosidium Safety Shield plan. This process fills the crack, chip, or star with a resin that bonds the glass together preventing the break from spreading and restoring the strength and integrity of the windshield. If the windshield is not repairable through this process, the front windshield will be replaced and retreated with the windshield protection product.

Benefits of Windshield Safety Shield:

Treated windshield product prevents cracks, chips, stars, sand pitting

Water resistant to help reduce snow and ice build up as well as glare

Small chips can quickly become too large to repair (6" or less are repairable) and become a safety issue

Repairing versus replacing a windshield maintains the original factory seal

Repair process is fast, convenient - typically less than 30 minutes to complete

Replacement of windshield is covered if technician determines windshield is not repairable

No deductible, transferrable plan

Safety Shield Protects

Prosidium Safety Shield protection plan provides unlimited benefits for the term of the plan to cover costs to repair the vehicle's treated front windshield.
